

Young-Onset Colorectal Cancer (CRC)

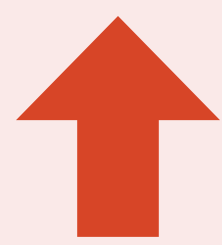

1 in 5

people diagnosed before age 50

The <50 Age Group ...

- Now accounts for **more than 10%** of all CRC cases.

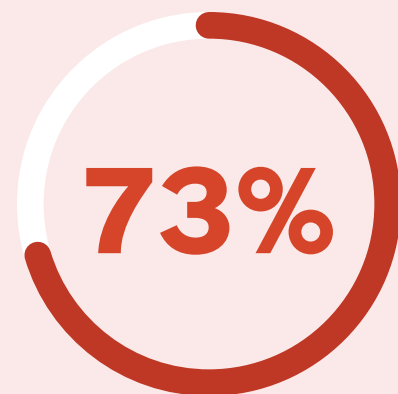

- Incidence and mortality are increasing significantly.

- Often undiagnosed or misdiagnosed when presenting with symptoms.

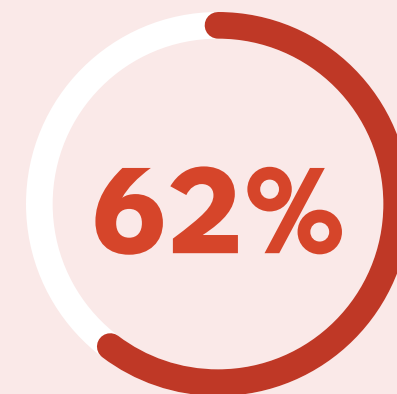

A recent survey of young-onset CRC cancer survivors found:

delayed diagnosis by 6 months due to low suspicion

were diagnosed when their CRC was late stage

had no family history of CRC
